reconstruction

Katalog IZGRADNJA, OBNOVA, REKONSTRUKCIJA, predstavlja prikaz referentne liste objekata koje smo izgradili i rekonstruisali tokom dvadeset godina aktivnosti dve generacije osnivača Vektor firme. Katalog izvedenih objekata i instalacija je obrađen na način kako bi potencijalni investitor, koji namerava da izgradi ili rekonstruiše objekat, mogao da i bez bilo kakvog prethodnog znanja iz ove oblasti, isprati postupke tokom gradnje i stekne utisak o građevinskim i instalaterskim fazama izvođenja koje ga čekaju tokom realizacije željenog objekta. Investitori koji su imali prilike da prethodno sagrade objekat, uvidom u katalog, mogu steći utisak o našem radu i oceniti sve postupke koje primenjujemo kako bismo omogućili maksimum efikasnosti i kvaliteta objekta, u okviru tačno zadatog, obično vrlo ograničenog, budžeta i roka izvođenja.

U pomenutom periodu, za potrebe brojnih državnih institucija, industrijskih i privatnih investitora, izveli smo objekte vredne više destina miliona eura, isporučili i ugradili:

- preko 5.500 kotlova snage od 24 kW do 24 MW
- 3600 gorionika snage od 24 kW do 15 MW
- Rekonstruisali 15.000 m² fasada zaštićenih zakonom
- Rekonstruisali na desetine hiljada kvadratnih metara različitih ustanova
- Izgradili veliki broj objekata različite namene.

Kvalitetnim radom i isporukom vrhunske opreme iz programa svetski poznatih principala, koje godinama zastupamo, stekli smo status pouzdanog partnera.

Iskustvo koje smo stekli tokom realizacije projekata, garancija su efikasnog i fleksibilnog instaliranja, izgradnje i postprodajnih usluga, uvek obeleženih željom da se postigne potpuno zadovoljstvo klijenata.

The publication CONSTRUCTION, REFURBISHMENT, RECONSTRUCTION, represents a comprehensive overview of 20 years of Vektor company's activities and a list of its selected references. It is dedicated to our potential customers, providing them with a complete insight to our construction operations and steps taken towards completing various facilities in the optimal way, within the projected budget and timeframe.

The experience gained from the projects executed for numerous government institutions, industrial and private investors, is a guarantee of efficient and flexible design work, supply and installation of quality equipment, construction works and after-sale services, aimed to achieve full client satisfaction. Within the above mentioned period we have:

- Delivered and installed over 5500 boilers of 24 KW to 24 MW
- Delivered and installed over 3600 burners of 24 KW to 55 MW
- Renewed 15.000 m² of facades protected by the law
- Renewed tenths of thousands square meters in various institutions
- Constructed large number of various facilities

Good quality work and supply of excellent, state-of-the-art equipment from the production programmes of world-wide known principals, which our company represents for many years, brought us a status of a reliable partner among domestic clients and foreign companies. At present, we are a system that is capable, both from the technical and expert's aspect, to design, renew and build the most complex energy-related and other facilities as per „turn-key“ principle.
